GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Irrigation.
Account.

READ—the following papers:—

I

Letter—from C. W. WOOD, Esq., Superintending Engineer, VI Circle.
To—the Chief Engineer for Irrigation.
Dated—Camp Periyár, the 18th August 1907.
No.—450 C.E.

I have the honour to forward herewith, for your approval and sanction of Government, an estimate amounting to Rs. 3,300 for constructing an inspection bungalow at Edayapatti, a hamlet near Tiruvadúr on the borders of the Sivaganga zamindari in the Madura taluk, Madura district.

As irrigation is rapidly extending in almost all the villages at the tail end of X and XI branch channels and distributaries of XII branch channel the bungalow will be very useful both for Revenue and Public Works Department officers, as a halting place from which inspections can be made. The existing thatched shed is in a dilapidated condition and not fit for use.

2. The Collector of Madura, to whom a reference was made on the subject, reports in his letter, D. Dis. No. 487, dated 30th June 1907 (copy enclosed), to the Executive Engineer, Madura division, that he is in favour of constructing a bungalow at the station.

3. In the report attached to the estimate, the Executive Engineer explains fully the necessity for and the details of the work proposed. The existing out-houses attached to the present thatched shed will be utilized and no new building will be necessary.

4. The rates provided in the estimate are fair and the estimate is recommended for sanction.

ENCLOSURES.

Letter—from the Special Deputy Collector.
To—the Collector of Madura.
Dated—the 30th June 1907.
No.—D. Dis. 487.

In reply to your R.O.C. No. 2485 Gl., dated 16th June 1907, I have the honour to state that a rest-house at Edayapatti will certainly be useful. It will be used not only for inspection by officers of the Public Works Department in connection with works relating to the irrigation of the tail end tracts under the X, XI and XII branch channels as stated by the Executive Engineer but will also enable officers having to do inspection work to give greater attention to the undeveloped areas within conveniently short distances therefrom.

2. It is on the cross road branching from Madura and Mélúr road at about the fifth mile from Madura and joining the Mélúr-Tiruppavanam road at Tiruvadúr 6 miles to the south of Mélúr. There are rest-houses at Chittampatti 6 miles to the north-west and at Mélúr 8 miles to

the north-east. They are not convenient places from which one can inspect and work in the tail end tracts which are all in the south. Considering the fact that the present rest-houses on the main channel are 5 to 9 miles apart from each other, I cannot say that the proposed rest-house is unnecessary. The Revenue officers and other officers who have work to do in these parts will also find it a great convenience.

3. The enclosures to your letter under reply are returned.

No. Dis. 2074-Rev.

Communicated to the Executive Engineer, Madura division, with reference to his letter No. 1090 M., dated 7th June 1907.

2. The enclosures received with his letter are returned.

H. F. W. GILLMAN,
Collector.

Report to accompany the estimate for reconstructing the old inspection bungalow at Edayapatti.

	RS.
Amount of estimate	3,300

This bungalow is situated at 3 miles 4 furlongs of Chunamboor offtake near Edayapatti village 15 miles from Madura near the road from Mélúr to Sivaganga. It is in the midst of an undeveloped area of the Periyár delta and lies close to the tail end of the 10th, 11th and 12th branch channels. Some of the biggest tanks of the delta lie close to it. This area will be developed much more rapidly if the bungalow is made comfortable. The large extensions in progress in the Periyár delta are mainly in the neighbourhood of this bungalow. The capacity of the Periyár lake is being increased by 70 per cent.; one part of the works which are being carried out to bring about this increase in capacity, viz., the raising of the level of the lake will, it is hoped, be finished during the present south-west monsoon and the second part, viz., the deepening of the water-shed cutting is nearly half done. These works will probably add 50 per cent. to the area irrigated by the Periyár works. Edayapatti is in the midst of the extensions of irrigation which are now going on and will be useful as a point from which inspections can be carried out for further extensions. It is a mile from Tiruvadúr and 3 miles from Kunnathur tank and close to the border of Sivaganga zamindari.

The walls of the old bungalow are of mud and its roof of thatch. It is proposed to demolish the old bungalow and sell the old materials. The existing stables and go-downs will be kept. The new construction will have walls of burnt stone in mud and a roof of pan tiles and flat tiles, otherwise it will be built on the plan sanctioned in G.O., No. 157 W., dated 24th January 1905.

A. R. DECHAZAL,
Executive Engineer, Madura Division.

II

Note by the Chief Engineer for Irrigation.

The Superintending Engineer, VI Circle, submits an estimate for reconstructing an inspection bungalow at Edayapatti, Madura district, with the letter read above explaining the necessity for the work. The Chief Engineer for Irrigation concurs in the Superintending Engineer's opinion that a permanent bungalow is really required in place of the existing dilapidated mud hut. The actual estimated cost of the work is Rs. 3,485, but the Superintending Engineer has reduced it by Rs. 185 which is stated to represent the value of the materials of the old bungalow at the place which will be available for sale. This procedure is not in accordance with the provisions of paragraph 2157 of the Public Works Department Code, under which the original cost of the old work will have to be written back to the Revenue account of the Periyár Project if its original cost was charged to the Capital account. The estimate has therefore been increased to Rs. 3,485 and is recommended for sanction.

2. The Superintending Engineer will be requested to report the approximate original cost of the old work and the account head to which it was charged.

25th October 1907.

H. E. CLERK,
Ag. Chief Engineer for Irrigation.

Order—No. 471 I., dated 30th October 1907.

NOTES.

Inspection bungalow at Edayapatti Madura Dt

PUBLIC WORKS DEPARTMENT

(Irrigation Branch).

From the Supg. Eng. VI Circle No 480 ~~CE D 18-8-07~~

Current No. 5456 dated 26-8-07.

Constructing an inspection bungalow at Edayapatti, ~~[illegible]~~ Madura taluk, Madura Dt.

It is stated in the report that the old bungalow in this place is built of mud walls and covered with thatched roof. The walls of the new building are to be built of burnt stone in mud and covered over with tiled roof. The existing stables & godowns are proposed to be retained.

The positions of all the existing bungalows are marked in red on the map of the Madura District herewith put up according to Bd's orders on the current. The village at which the bungalow is now proposed to be renewed is underlined in red pencil. This site is also marked on the map of the Periyar project.

It is also stated that the Collector of the District is in favor of constructing a bungalow at the place now proposed as it lies close to the tail end of 10th, 11th & 12th branch channels where large extensions in the Periyar delta are in progress.

For orders if the Estimate may be checked for sanction.

I know this place. The want of a rest house here was badly felt by me on two occasions when I was there. The existing shed is quite ~~[illegible]~~ unfit

[illegible]
2/9/07.

2/

E. I.

The bungalow is very necessary, Edayapatti is difficult to get to from the Madura-Melur road in the rains as the country is formed of a very treacherous soil.

Edayapatti is near the third mile of the Chunnambar offtake of the 10th Branch Ch.

[illegible]

Submitted to H E the Governor

Estimate for reconstructing a Inspection bungalow at Edayapatti Madura District Estimate Rs 4,286

It is proposed to build a bungalow on the site of an old shed in the Madura Taluq. The site is conveniently situated for the inspection of a tract where irrigation under the Periyar Project is increasing and the bungalow will be useful for both Revenue & P.W.D officers.

It is proposed to charge the bungalow to the Capital account of the Project. The proposal has been approved by the Hon. Mr. Stokes C.S.I.
